

Shades whose beauty lasts

You know the trouble you have always had with window shades—before they are up very long, the "filing" starts to crack and fall out, leaving unsightly streaks and "pinholes."

Brenlin Unfilled Window Shades

wear so well because they are made of closely woven cloth entirely without that filling of chalk and clay you find in ordinary shades.

Come in and let us show you this shade that always hangs straight and smooth and lasts several times as long as others.

Our VACUUM CLEANERS does the work—and does it thoroughly

75c and \$1

SMELTER PRODUCTION FOR APRIL 22,000,000

(Continued From Page One.) year \$787,500 in dividends. A further increase in disbursements for the third quarter may reasonably be expected.

The Journal-Miner of Prescott, Ariz., under date of April 23, says that "an option on the Calumet-Jerome group of claims has been secured by interests in control of Shattuck. It is said that the deal is practically closed, and development work will begin soon." The properties described are in the Black Hills range of Arizona.

An effort to confirm the report in Duluth was unsuccessful.

Higgins Leasing Company

Though the Higgins Leasing Company has not operated since Thomas Higgins took over his property on the hill the organization has been making every possible effort to secure a property to work. Engineers have been working on a New Mexico property, in the neighborhood of Lordsburg. Definite action on this property will be known in a couple of days.

It is thought very probable that the Higgins people will take over some claims in the northern part of the state, though nothing definite has been announced in this section.

The Higgins is the company which made a mine out of the famous Higgins property after several hundred

thousand dollars had been spent without results. The company has a good organization and is in shape to handle a property with excellent returns.

The Higgins Property

General Superintendent Flanagan, of the Higgins property, owned and operated by Thomas Higgins, formerly of Bisbee but now a resident of Los Angeles, announces that though no big ore bodies have been uncovered recently, some excellent indications have been had. The superintendent indicates that with a substantial development of ore reserves the owner will install a tram from the mine to the railroad and save some of the expenses now had in hauling the ore to the tracks and handling it twice.

Important Deal Pending

The consolidation of a number of

claims in the Warren District, and financed by New York capitalists, is very possible. Nothing definite is known of the progress of the deal, at the present time, but it is thought more than probable the organization will be formed. If the prospects materialize it will mean a decided boost for Bisbee.

Commonwealth Extension

Commonwealth Extension is coming into its own. The officers of the company are not misrepresenting anything in regard to the property. They say they have an "elegant prospect." That, however, is putting it mildly for every possible indication points to the development of a great mine on the property. Those who have had faith in the ground, some day, will not be disappointed; and it would appear

that "that day" is coming closer with each bucket of ore taken from the mine.

Nacozari Consolidated

It is officially reported that the Nacozari Consolidated Copper Co., operating a few miles south of Nacozari, Mexico, have recently opened up a high grade streak of ore on their San Pablo claims, assaying 1,020 ounces silver, 28.54 percent copper. The ore has recently been exposed by development, and will be worked conventionally from the big working shaft which has recently been exposed to development, and will be worked conventionally from the big working shaft which the company is now sinking on the San Pablo. The company re-

ports the shipment this week of a high grade car load of silver-copper-lead-gold ore to the El Paso Reduction works, through the International Commission Co., of Douglas. The company is now working about 50 men.

The Future of Copper

Iron Ore has the following comment on the copper situation, both present and future.

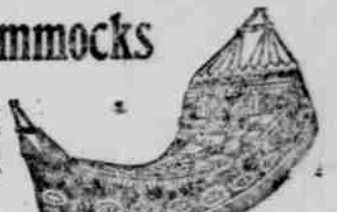

"With this great war over, which all hope it soon will be, with the business of our country again in business hands, with the markets of the world to be gained, with our own to be supplied, copper is surely going to be mined at an enormous rate long after the conclusion of this great European struggle. There is no cop-

per on hand anywhere, no stocks at mines, smelters or at manufacturing plants. Germany is entirely bare and is offering big prices for the metal in any form the smallest trinkets upward. The world has only just commenced on the electrification of things. We face to have a wonderful domestic market in this line the world over, and particularly in our own country. When the business of the world is normal there is an enormous consumption of metal, and copper is one of the chief demands in the world's progress and civilization. Copper will not sell at 30 cents per pound. That is too high, but it will command better than now this price at which level all the legitimate producers can make good money.

A big stock of Hammocks

—How fully this establishment is prepared to meet every expectation in styles patterns and prices is best demonstrated by a visit—the largest line we've ever shown.
